

Rahul Patil

Software & Database Engineer

.NET · SQL Server · Enterprise application support

Pune, India rahulpatil.patil12@gmail.com +91 88069 13688 [linkedin.com/in/rkp25](https://www.linkedin.com/in/rkp25) github.com/rahulpatil25

Developer at **Tata Technologies** since 2021, building and running the .NET applications and SQL Server databases behind manufacturing operations for a leading automotive client. I keep business-critical systems at **99.9% uptime**, tune the SQL behind their reporting, and own Level 2/3 support from incident ticket to production deployment.

99.9% uptime on business-critical databases **30%** faster report generation **50%** faster incident resolution

20 Windows Server environments

EXPERIENCE

Tata Technologies Limited

Dec 2021 – Present

Developer · Pune, India

DATABASE ENGINEERING & PERFORMANCE

- Optimised SQL queries and data-retrieval routines across reporting workloads, **improving report generation speed by 30%**.
- Monitored performance metrics and troubleshoot production issues daily, **sustaining 99.9% uptime** on business-critical databases.
- Partnered with the DBA team on SQL Server maintenance, safeguarding data integrity and query performance across environments.
- Led the database development team through a **Dealership Management System database rebuild**, and delivered Dell Boomi ETL integrations for a leading parts manufacturer.

APPLICATION DEVELOPMENT & DELIVERY

- Built and maintained internal .NET / jQuery / HTML / CSS web applications that put **real-time reporting on 25+ shop-floor metrics** in front of MES users — plant data without a DBA in the loop.
- Developed, deployed and maintained enterprise applications — reporting sites and GE Cimplicity — across **20 on-premises Windows Server environments**, planning releases for minimal downtime.

PRODUCTION SUPPORT & PROCESS

- Owned **Level 2/3 application support** for critical systems, driving incidents and changes through BMC Remedy and streamlining the change-approval path.
- Implemented ITIL-aligned incident and change management with cross-functional teams, **reducing incident resolution time by 50%** and improving change success rate.

SKILLS

LANGUAGES

C# · SQL · JavaScript · Python · Java · C++

DATABASES

Microsoft SQL Server · PostgreSQL · MySQL · Query optimisation · Performance monitoring

WEB & FRAMEWORKS

.NET · jQuery · HTML5 & CSS · React · Node.js

PLATFORMS & TOOLING

Windows Server · GE Cimplicity · Dell Boomi · Tableau · Batch scripting · Git & GitLab

SUPPORT & PROCESS

ITIL framework · BMC Remedy ITSM · Incident & change management · Release management

EDUCATION

B.E., Computer Engineering

Aug 2016 – Nov 2020

Savitribai Phule Pune University — Pune, India

General Management Program

2022 – 2023

Stoa School

Open to Software / Database Engineering roles — [get in touch](#).
